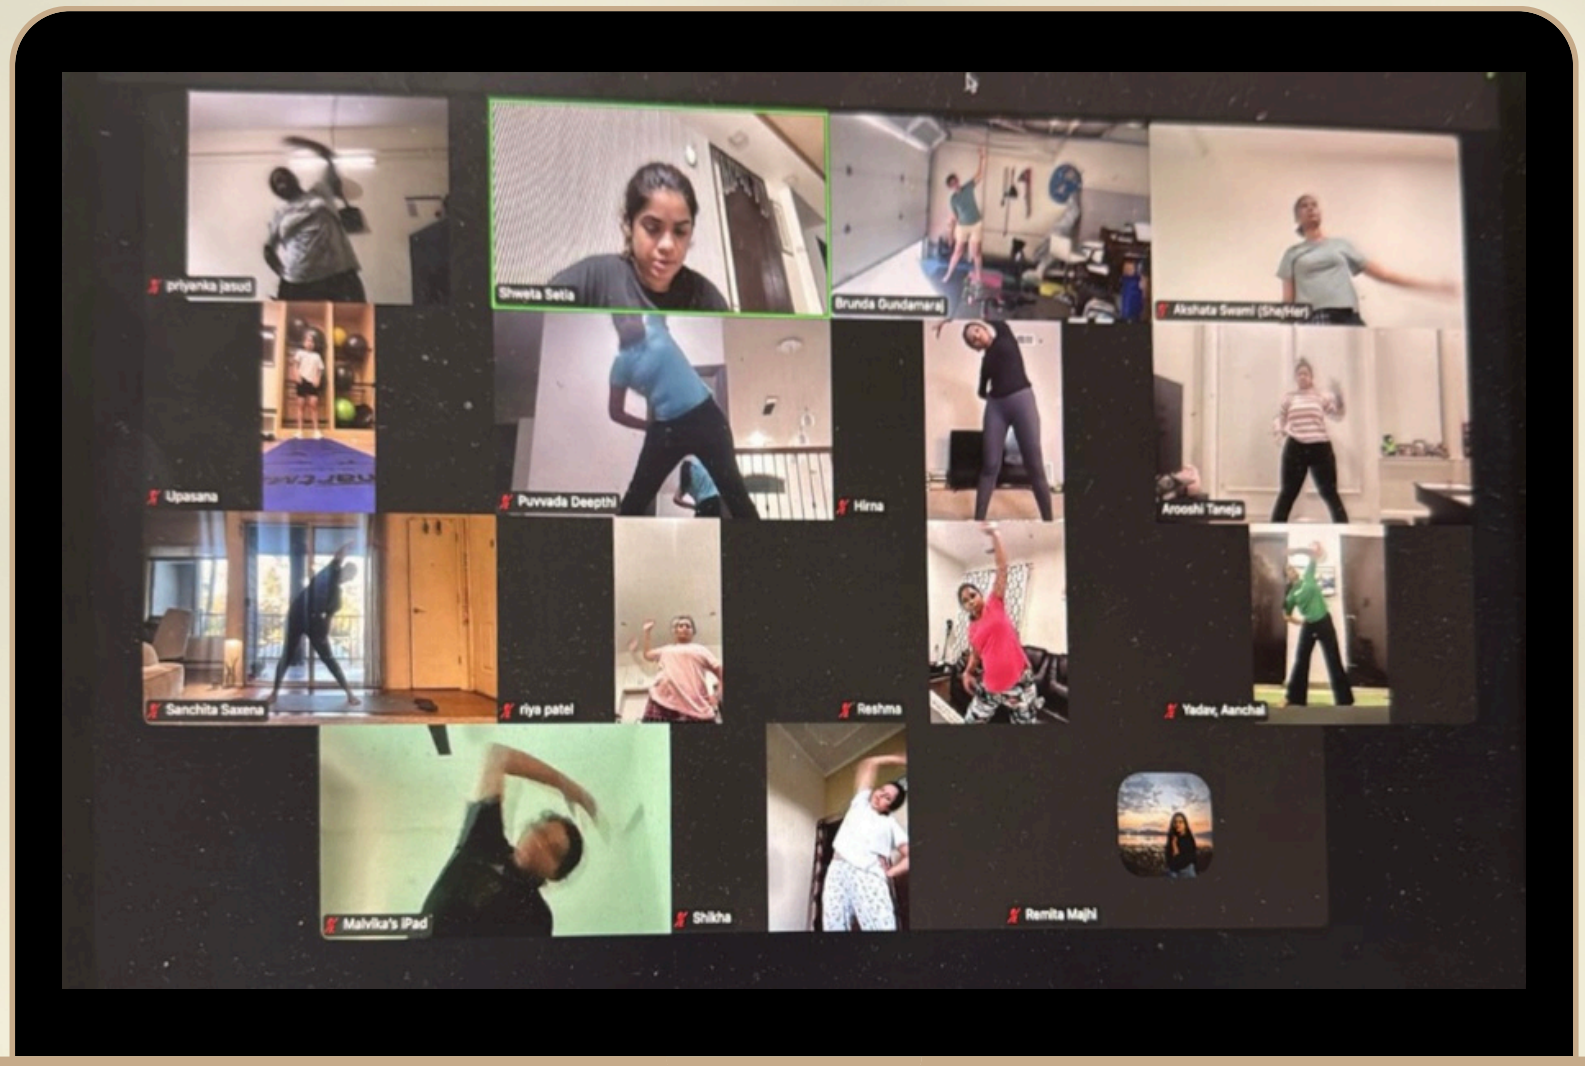
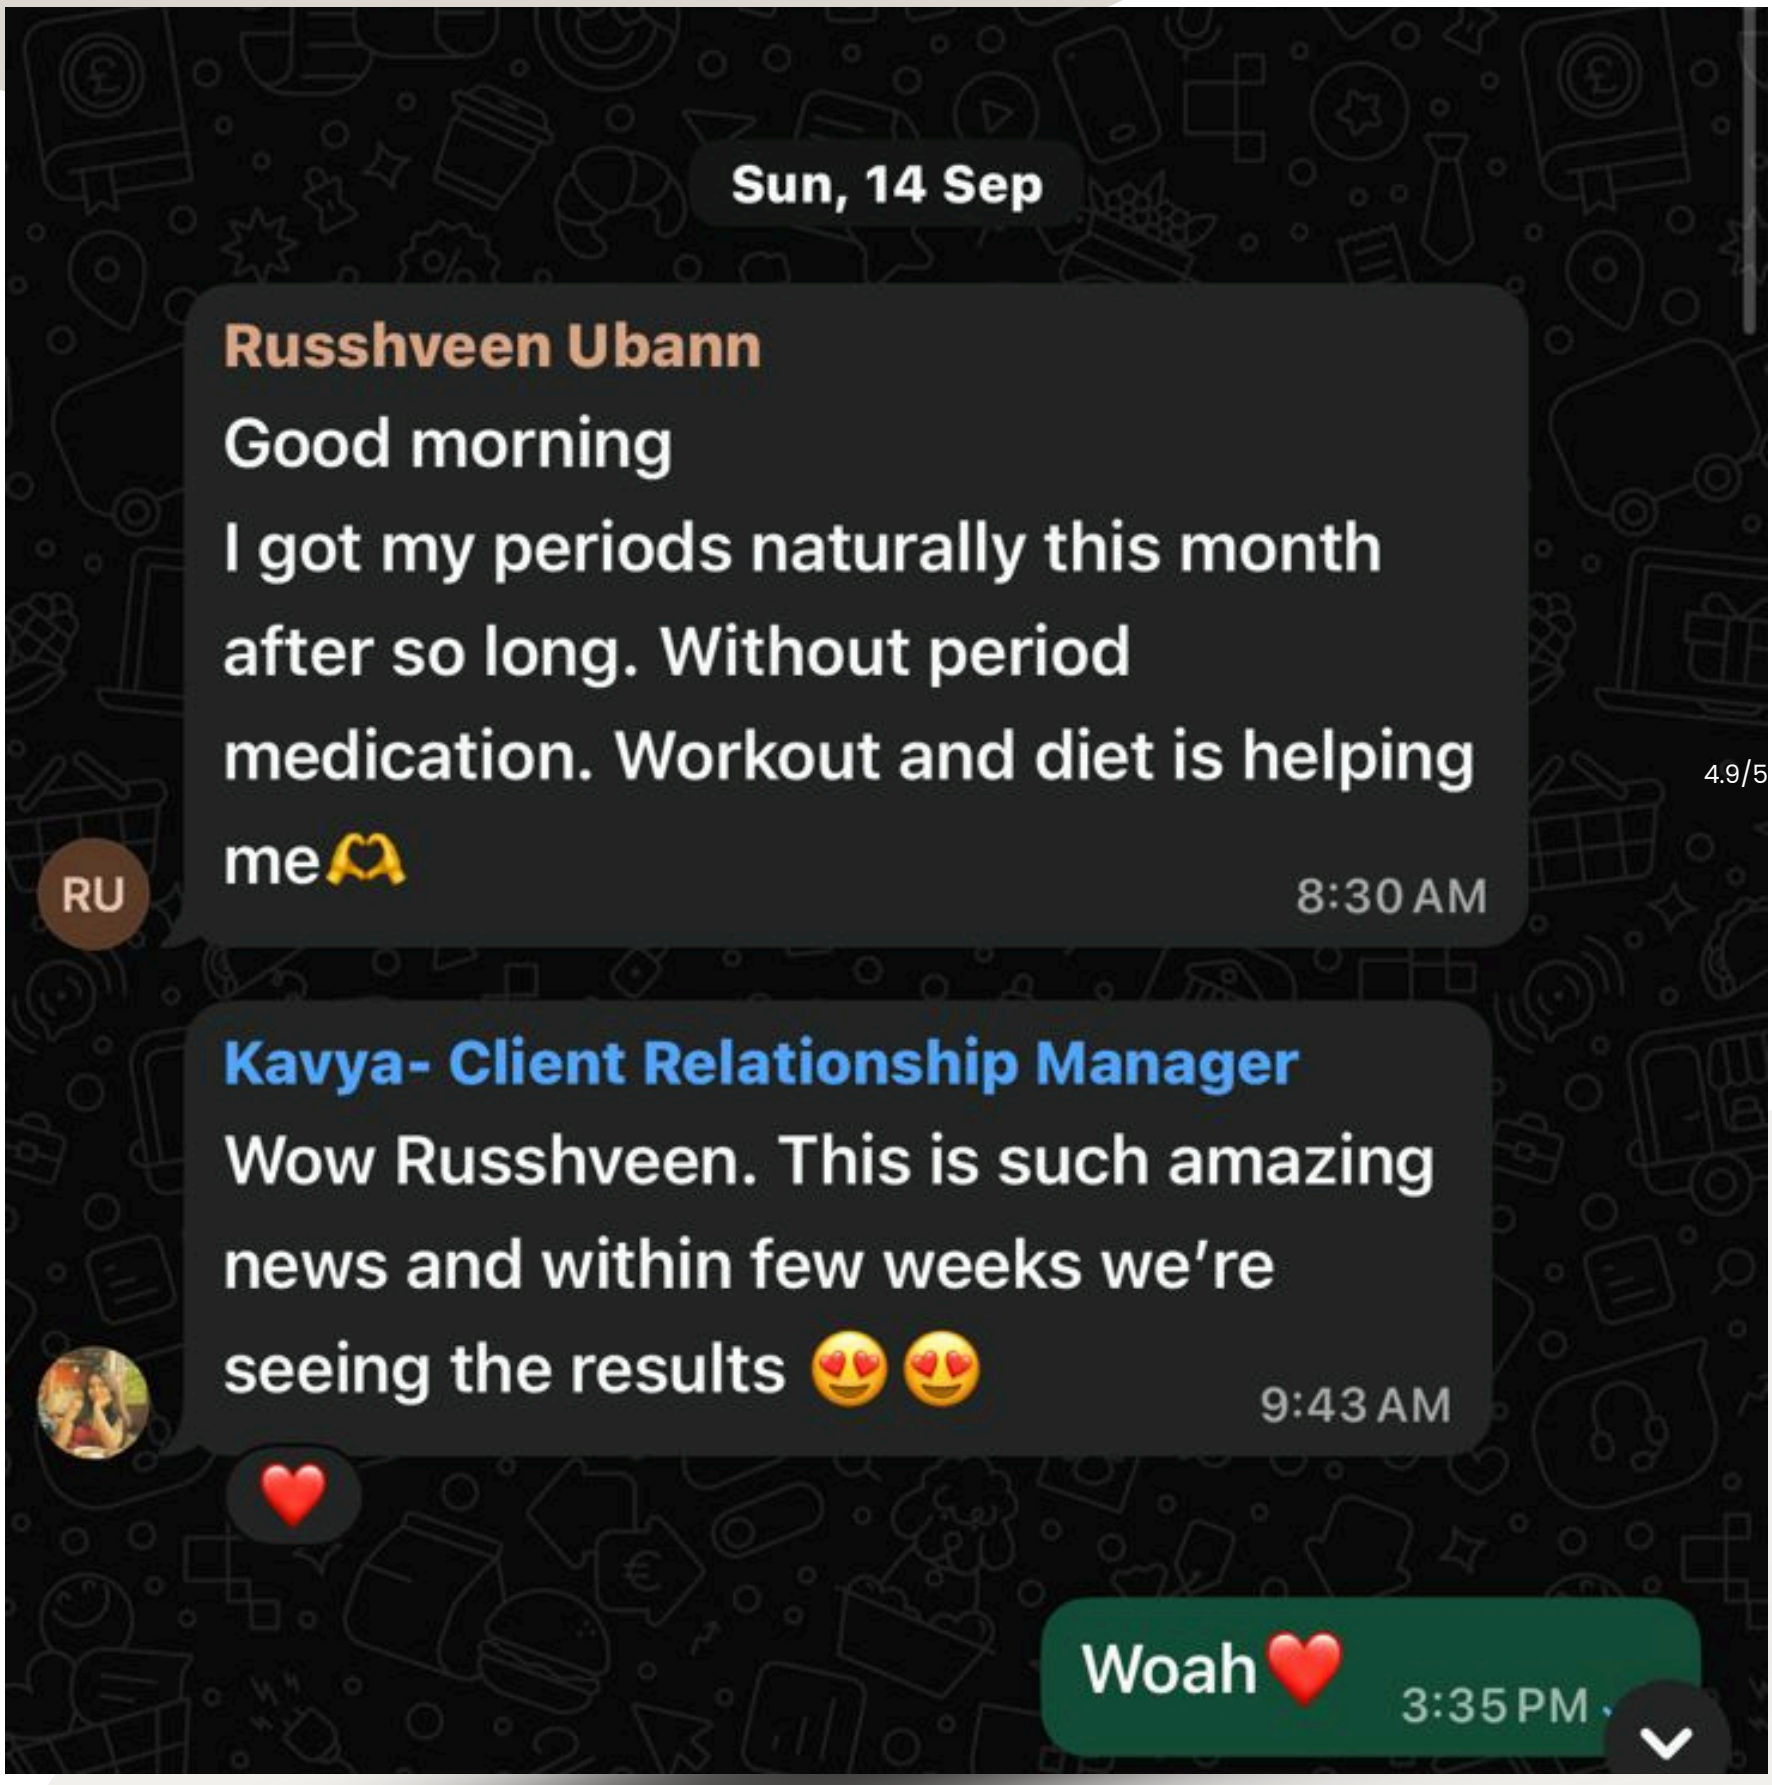
# WHAT CLIENTS SAY
## About us



# fixing lifestyle



4.9/5

# results that last

Today marks two months since I embarked on this journey, and I'm incredibly grateful for having made the decision to join this program. Over the past 60 days/8 weeks, I've successfully lost 7.5 kg. Although it may not seem like a lot, it's been enough to break through the mental barrier that was holding me back. Now, I feel confident that I can continue to achieve my goals. THANKYOU SO MUCH 💙

4.9/5

I'll share the measurements tomorrow morning. I was in a rush this morning, so I just checked my weight for now.

# A complete health revamp

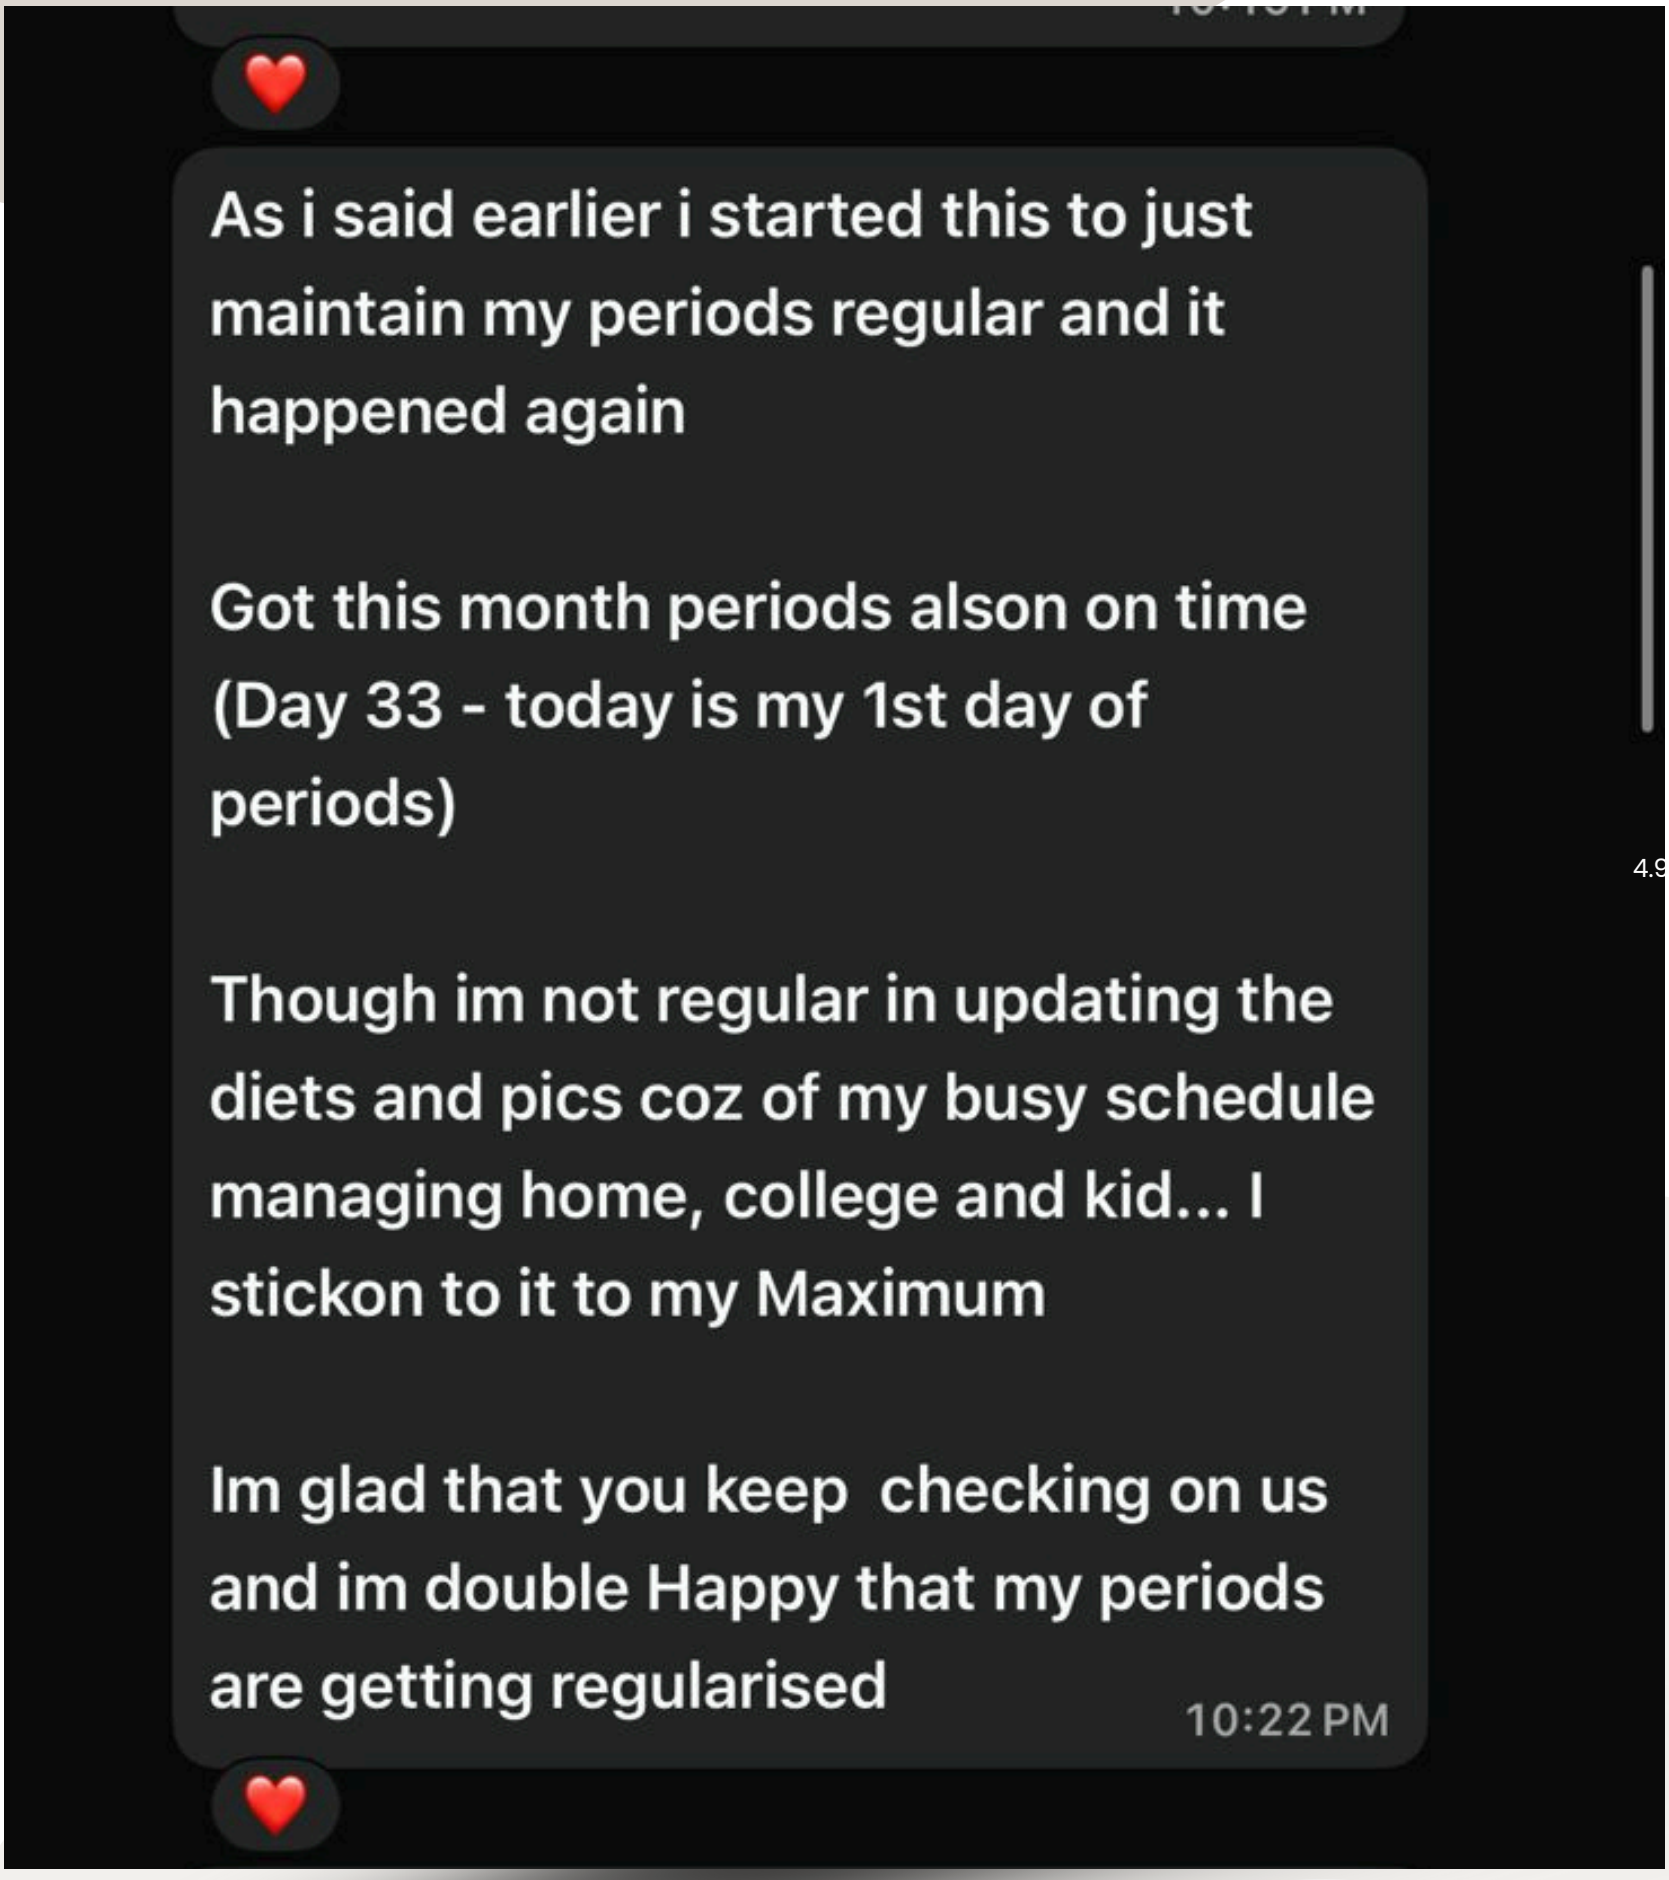
2. Even though there are ups and downs in staying consistent- I am being very mindful now to keep in mind the portion control and healthy choice of meals
3. Recently I did my yearly blood checkup and surprisingly my HDL cholesterol went up from 39 to 47(which is good) and Triglycerides went down from 129 to 96. Even though there was slight in my LDL(108 to 129) - cholestrol ratio was within range). All other counts are normal too

8:11 AM

❤️

Thank you both for all the motivation and guidance and I will continue to make healthy choices!

# Hormones in check



# A truly personalised program

I started this journey a couple of months after I joined residency, struggling with my deteriorating lifestyle and exhaustion. I was not eating enough or sleeping enough, my energy level was declining fast and I was running on coffee exclusively on most days. I then gave myself 3 months to change this, hoping to bring back discipline into my chaotic schedule. The habit of documenting my meals, movement, water intake, sleep hours, and daily meditation kept me accountable and disciplined. Soon I saw changes in my body strength, better immunity, moving daily and becoming more active, lesser cravings, better mood. I feel stronger, happier and calmer than I did 3 months back! Thank you to the team for a doable diet plan, for accessible workouts and for keeping me accountable!
